## Popularity of sport

Sport is a popular part of the culture in the UK. There are many factors which can impact upon the popularity of sport in the UK

### Lack-of-childcare

#### Spectatorship

The more people are viewing sports will increase participation rates of those sports

#### Environment

Weather in the UK can impact upon participation rates. There is a lack of snow in the UK for skiing

#### Media coverage

Some sports channels show sport 24/7, this increases participation in the sports that the media show

#### Roles models

Positive Roles models increase participation in the sport. A lack of role models has a negative impact

#### Participation

More people participate in sports that have widespread mass participation

#### Acceptability

Many people believe boxing should be banned as it's dangerous

#### Provision

Provision varies in the UK. People cannot participate with little or no provision or access to facilities

#### Success for teams

Sporting success inspires people to take part in the sports such as GB cycling

Using the images, identify the different user groups who may participate in sport

For example, the lack of mountains and snow across the country for taking part in winter sports. Consequently, the environment/climate means that winter sports such as skiing make the sport less popular. Participants don't have access to an environment with many mountains and a climate with snowfall that allows them to train and compete so alternatively may get involved in sports that are much more accessible in the UK. An example would be football where there are lots of readily available facilities.</p>
