

## Live Lessons

### Student Expectations

- **Students should be online from 9am to access their normal form time and timetabled lessons.**
- **Lessons will last for 45-50 minutes.**
- Students should click on the classroom for their timetabled subject a couple of minutes before the lesson is due to start using the instructions below.
- Students must have their camera on.
- Students should dress appropriately and choose a quiet room from which to access the live lesson.
- Students should sit in front of an appropriate back drop.
- Students should wait patiently for the 'Meet' link to appear at the top of the screen. This may take a few minutes as teachers transition between lessons.
- Students should keep a piece of paper, exercise books and some pens nearby, so they are organised and well prepared for their learning.
- A device should be set up in a quiet room, away from distractions. Students should let other family members know when they are accessing live lessons, in order to avoid interruptions.
- Students should mute their microphone once the lesson has begun.
- Students should engage with the lesson by using the chat function or unmuting themselves to talk, when instructed by the teacher.
- Students should have their camera on to engage fully with the lesson.
- Students must not use the chat function for anything other than work-related conversation; the chat can be seen by everyone.
- A student may raise their hand to get a teacher's attention by typing an exclamation mark into the chat box.
- Resources from the lesson will be shared before the lesson and students can revisit should they wish.
